OBJECTIVE

Motivated B.Tech student passionate about Coding, AI/ML, and UI/UX Design. Proficient in Python, C, HTML, CSS, Canva, and Figma. Interested in Agentic AI and building impactful technology solutions.

EDUCATION

B.Tech in Computer Science and Engineering St. Joseph's College of Engineering and Technology (KTU), Palai, Kerala	2023 – 2027
Class 12 St. Antony's Public School, Anakkal	2018 – 2020
Class 10 St. Antony's Public School, Anakkal	2017 – 2018

SKILLS

Programming: Python, C, HTML, CSS
Tools: Git, GitHub, VS Code, Figma, Canva, Adobe Express
Operating Systems: Windows, MacOS, Linux (2+ years experience)
Concepts: AI/ML Basics, Agentic AI, Prompt Engineering

EXPERIENCE

Design Team Member, SAEI SJCET Palai - Designed posters using Figma, Canva, and Adobe Express. - Collaborated with team members to create visually engaging content.	Jan 2025 – Jan 2026
MuLearn Learner - Secured 3rd place in ScratchX (A Game Development Competition). - Achieved 2nd place in Think Ovation Ideathon. - Completed 30 days musprint challenge. - Reached Level 4.	Sep 2023 – Present
AI-Integrated Digital Marketing Intern, IPSR Solutions Ltd Worked on AI-based marketing strategies and campaign optimization.	Feb 2025 – Mar 2025
National Cadet Corps (NCC) - Actively served as an NCC cadet, demonstrating discipline, leadership, and teamwork. - Assisted in organizing and hosting various events, war demos, and competitions including Best Cadet selection, RDC competition, and obstacle running events. - Successfully completed and passed both the B Certificate and C Certificate examinations during the three-year tenure.	2020 – 2023
Volunteer – Byte Arena, Asthra 10.0 Tech Fest - Volunteered for Byte Arena, a mystery-solving competition conducted during Asthra 10.0. - Assisted in coordinating a multi-round event involving debugging-based clue solving, crossword challenges, and logical problem-solving tasks. - Acted as a “culprit” in the final interrogation round, contributing to an interactive and immersive experience for participants.	2025

PROJECTS

Customer Relationship Management System (C & SQLite)

Developed a menu-driven Customer Relationship Management System using C language with SQLite as the database backend. The system manages customer records, stores data efficiently, and performs operations such as adding, updating, deleting, and retrieving customer information.

Server-Client Connection & Armstrong checking(C)

A simple IPC (Inter-Process Communication) project in C using Named Pipes (FIFOs) to check whether a number is an Armstrong Number through a Server-Client architecture. [GitHub Link](#)

CLI-Based Travel Itinerary Generator (Multi-Agent System)

Developed a command-line travel itinerary generator using a multi-agent system as the final project of the MuLearn Agentic AI Bootcamp. The system coordinates multiple agents to gather inputs, process travel preferences, and generate structured travel plans efficiently.

Pocket Diary – Chrome Extension

Developed a minimalist Chrome extension to instantly capture, store, and export ideas efficiently. Designed for quick note-taking with a simple and distraction-free interface.

[GitHub Link](#)

Retro Space Shooter – Asthra 9.0 Tech Fest Project

Developed a 2D space shooter game featuring a spaceship navigating through asteroids and alien enemies. Implemented hand gesture controls to steer and shoot using computer vision techniques. Players start with three lives and score points by dodging obstacles and eliminating enemies.

Tech Stack: Pygame, OpenCV, MediaPipe

ACHIEVEMENTS

- **1st Place** – SAEINDIA Bio-Mimicry college level (2025)
- **2nd Place** – Mobile App Development Competition, SAEINDIA college level (2025)
- **2nd Place** – Think Ovation Ideathon, MuLearn, South Zone Level (2026)
- **3rd Place** – ScratchX Game Development Competition, MuLearn, South Zone Level (2026)
- **Best Position** - IEEE-CS/RAS Web Competition for College of Engineering Karunagappally (Aug 2025)
